

Muhammad Hassan

Software Engineer

Lahore, Pakistan | immhassanr@gmail.com | +923355340041 |

Overview

Detail-oriented **Software Quality Assurance Engineer** with hands-on experience in **manual testing, AI-based application testing, and web application quality assurance**. Currently working at **Nexrupt Technologies** on an AI-powered customer engagement platform. Skilled in test case design, defect tracking, regression testing, Exploratory testing and collaborating with cross-functional Agile teams to deliver high-quality software solutions.

Skills

SQA: Proficient in designing and executing comprehensive manual test cases, testing life cycle, leveraging Jira and blue.cc for efficient defect tracking and bug reporting. Developed and executed comprehensive test plans to ensure software and product quality, including smoke testing, regression testing, and functional testing to validate system stability and functionality.

Soft Skills: Communication, leadership, teamwork, problem-solving, adaptability, time management, critical thinking, creativity, and attention to detail.

Experience

Nexrupt Technologies — Software QA Engineer(Dec 2025 – Present)

- Actively working on **Dealer Pulse**, an AI-powered platform that allows customers to book car service appointments.
- Performed **end-to-end manual testing** of AI chatbot flows, appointment booking modules, and admin dashboards.
- Validated **AI response accuracy**, conversation flows, and edge-case handling.
- Executed **functional, regression, smoke, and UI testing** to ensure system reliability.
- Logged, tracked, and verified bugs using **blue.cc** collaborating closely with developers for timely fixes.
- Tested date/time validation, filters, user workflows, and system stability under multiple scenarios.

EDUCATION

University of Central Punjab | *Bachelor of Science in Software Engineering*

- Focus on manual SQA.
- Completed labs and projects in test case design, bug reporting, test/cycle documentation, and automation basics.

Projects

AI-Based Dealer Pulse Platform (Nexrupt Technologies)

- Tested AI chatbot behavior for customer queries and service scheduling.
- Verified booking flows, date-time validations, and system-generated responses.
- Identified critical issues related to incorrect data display and system crashes.

Manual Testing Project: A predictive Model for Sleep Interruptions

- Developed test cases and executed manual tests (functional, regression, usability) for a flutter-based Android app.
- Reported defects using different tools like Jira.
- Conducted smoke and exploratory testing to verify features and improve user experience

Task Management Web Application

- Created detailed test scenarios and test cases to validate task creation, assignment, and tracking features.
- Participated in daily stand-ups to discuss test progress and coordinate with the Agile team.
- Verified bug fixes and carried out regression testing before each release cycle.
