Summary

Full-Stack Software Engineer with hands-on experience building scalable SaaS platforms using Next.js, React, Node.js, and MongoDB. Skilled in designing secure authentication systems, RESTful APIs, and role-based dashboards. Passionate about performance optimization and production-ready deployments.

Education

University of Management & Technology	Bachelor in Software Engineering
Software Engineering	November 2022 - January 2026

Projects

Campus Connect AI Powered Web Application August 2025 - February 2026

- Built an AI-powered campus opportunity platform enabling students to access part-time jobs and startup collaborations through role-based dashboards.
- Engineered secure authentication and scalable RESTful APIs with Next.js, Node.js, MongoDB, and JWT, successfully supporting 500+ active users.

PropStake UAE Nov 2025 - Feb 2026

- Developed responsive frontend interfaces for a digital real estate investment platform enabling exploration and investment in tokenized property assets, with interactive dashboards for portfolio tracking and real-time insights.
- Optimized user flows, accessibility, and cross-device responsiveness to deliver a seamless investor experience.

<https://propstake.ai/>

Integrated Enterprise Resource Planning (ERP) Management System August 2025 - Nov 2025

- Developed a modular **Enterprise Resource Planning (ERP)** system integrating Finance, Inventory, Sales/CRM, Procurement, HRM, Manufacturing, and Project Management into a unified platform.
- Implemented automated workflows for accounting, stock tracking, order processing, payroll management, and vendor operations to streamline business processes.

Web-Based E-Commerce Platform with Secure Payment & Order Processing Jan2025- June 2025

- Developed a full-stack **E-Commerce Web Application** enabling users to browse products, manage shopping carts, and complete secure online purchases.
- Implemented product search, filtering, user authentication, and order management to enhance customer experience.

<https://e-commerce-version-2-0.vercel.app/>

- Developed and maintained the frontend of **ViaB Market**, a responsive e-commerce marketplace, using modern web technologies to deliver fast and intuitive user experiences.
- Implemented product browsing, search, filtering, and interactive UI components to enhance customer engagement and conversion.

HealthStake — Digital Healthcare Platform

Nov 2025 - Jan 2025

- Developed responsive and user-friendly frontend interfaces for HealthStake, a digital healthcare platform supporting patient engagement and health data management.
- Built an integrated **Nursing Portal** enabling nurses to manage patient records, monitor health metrics, and coordinate care workflows efficiently.

Experience

Tecnofuzion Technologies

November 2025 - Present

Junior Web Developer

- Developed high-performance SSR web applications using **Next.js and React**, improving page load speed and overall user experience by 30%.
- Implemented secure authentication flows, integrated RESTful APIs, and optimized client-side performance for responsive, production-ready interfaces deployed via Vercel.

Afaq Technology

July 2025 - October 2025

Frontend Developer

- Built responsive MERN stack applications delivering high-performance user interfaces.
- Collaborated with product teams to translate business requirements into technical solutions and sprint-ready deliverables.

The Game Cloud Studios

Jan 2025 - May 2025

React.js Developer Intern

- Developed reusable, scalable UI components using React.js and Next.js, integrating APIs and optimizing frontend performance for fast, responsive user experiences.

Skills

🔗 Collaboration & Agile Practices

Requirements Gathering & User Story Finalization, Stakeholder Communication, Sprint Planning & Agile/Scrum Workflows, Cross-functional Team Collaboration

★ Frontend Development

React.js, Next.js, JavaScript (ES6+), CSS3, HTML5, Tailwind CSS, Bootstrap, Responsive Design

🔗 Backend Development

Node.js, Express.js, RESTful API Development, JWT Authentication

🔗 Databases

Firebase (Firestore), MongoDB

★ Technical Proficiencies

RESTful API Integration, Authentication & Authorization, State Management, Performance Optimization, MVC Architecture

🔗 DevOps & Tools

Git, Github, Vercel, Postman, ESLint

🔗 AI-Assisted Development:

AI-powered debugging & code optimization, Chatgpt, Gemini, Grok, GitHub Copilot
